

MULTIVALUE SERVICES CAPABILITY STATEMENT & COMPANY PROFILE

ERP SOLUTIONS | DATABASES | UNIWARE CLOUD | SERVICES

Uniware offers freedom of choice. A specialist provider of the widest range of MultiValue Database solutions in Australia and New Zealand, Uniware is dedicated to providing AusVantage ERP and other MultiValue solutions on premise and in the cloud.

Let Uniware take care of your mission critical application within the Uniware Cloud.

About Us

Uniware Pty Ltd professional services division offers heritage application support and development services to MultiValue application users. We have offices and staff located in Melbourne, Sydney, Perth and Wuhan (China). The Uniware group includes Xceed Web Development Pty Ltd and OzISP Pty Ltd.

Since the late 1980's we have been a distributor or reseller of UniVerse, UniData, D3 (Pick) and other MultiValue (MV) database management systems (DBMS), offering support and development services for heritage application systems. Uniware has now teamed with Rocket Software to offer the widest range of MultiValue database applications with the addition of jBASE and OpenQM.

Many customers have decades of intellectual development, processes and data invested in their heritage applications and whilst looking to embrace contemporary technology do not wish to discard this significant investment.

Uniware provides products and services designed to provide customers with continuity of service and enhancement to these often complex applications whilst moving them forward with modern technologies where appropriate.

Uniware Services

Widely known for our Distrib ERP application software developed during the 1980's and more recently our AusVantage ERP system developed for MultiValue DBMS, we continue to develop new applications and solutions using contemporary technologies. Our development and consulting team in Australia and China provides the following services:

- Support and Development of MultiValue Applications
- Rocket Software jBASE and OpenQM Support and Maintenance
- Rocket U2/D3 Support and Maintenance
- Rocket System Builder Development, Support and Maintenance
- Integrated BI and Reporting Solutions
- Disaster Recovery Solutions, Data Replication, Remote Hosting
- Mobile Application Development
- Website Design/Integration and Hosting Solutions
- Integrated API Solutions
- Integrated e-Commerce Solutions
- Web Service Integration
- Wireless/Barcoding Solutions
- Heritage Application Modernisation
- Integration of MultiValue Databases with External Databases
- E.G. Microsoft SQL Server
- Technical Support for UNIX/LINUX

**Support, enhancement,
integration, modernisation
and transition of heritage
MultiValue database
systems**
